

GLIDE

NO Screeching Breakage

Introducing *NANO GLIDE*

Nano Glide is a nano stretch film specially designed with slip technology, giving you a high level of slip surface on the outside so your load can slide off each other. A film so smooth each pallet glides against the other with less friction; more grace, increasing your efficiency and productivity in the warehouse

- ✓ **Designed with slip technology**
- ✓ **Giving you a high level of slip surface on the outside**
- ✓ **Smooth film help pallet glides against the other with less friction**
- ✓ **Insecure a sing your effeciency and productivity in the warehouse**
